**Directions for paying (with credit card) through PayPal:**

Click the yellow PayPal button in the upper left corner of that screen. There will be a form for name, email address & phone number, and event/service. Select hunt event payment, and then click "pay now"

It does for some reason say "Thank you for your payment" but nothing has been paid at this point. The next screen will come up with purchase details. Just put in the total amount for the event. Do not try to itemize - we will have the details from the email you just sent. Just leave the quantity as 1. Push "Continue"

After that it has you either pay with your PayPal account, or scroll down, & it will have another button that says pay with debit or credit card. If you push the credit card button, it will take you to a screen to give your credit card info and after that, it has a button that says something like Pay Now. That should complete it.
